example in entomology: in some Lepidoptera, including most butterflies, the pupa attaches to a surface by the cremaster, a structure at the tip of the pupal abdomen.

### **Glossary of entomology terms - Wikipedia**

The bodies of insects have segments, or

## Access Free Dictionary Of Insect Morphology By L Zombori

divisions, so they appear to have a series of notches cut into them. This led the Greek philosopher Aristotle to give insects the name entomon “a thing cut into.” Entomon comes from the prefix en- “in,” combined with the verb temnein “to cut.”
